

Cut along the solid line.

# Archie Pinwheel

**What you'll need: this page, a straight pin, a pencil with a new eraser**

1. Cut out the Archie Pinwheel along the solid black outline.
2. Next cut along the dotted lines, making sure not to cut all the way to the center.
3. Now fold over one of the A's, directly on top of the center B. Continue to fold the other three A's on top of the first to achieve the pinwheel's shape.
4. While holding the four edges in place carefully insert a straight pin through all the layers and out the back.
5. Press the pin securely into the side of a pencil eraser, leaving space to allow it to spin freely.
6. Give it a huff and puff and enjoy!
